Examiner's Statement of Reasons for Allowance

Claims 1-16, 20-24 are allowed because the prior art fail to teach or fairly suggest a leak detector and a method comprising a sensing circuit including a first thermistor adapted to detect a leak upon contact with a liquid, and a second thermistor functioning as a reference device; means for driving said first and second thermistors with a current such that the first and second thermistors operate in self-heated mode at a temperature above an ambient temperature, a comparing means for comparing a voltage at a reference point in said sensing circuit including said first thermistor with a voltage at a reference point in said sensing circuit including said second thermistor and determining leak condition based on the basis of the comparison results, in combination with the remaining limitations of claims 1-16.

Claims 17-19 are allowed because the prior art fail to teach or fairly suggest a control circuit a for a leak detector comprising means for driving said first and second thermistors with a current such that both thermistors operate in self-heated mode at a temperature above an ambient temperature; a control system for controlling said driving means, a comparing means for comparing a voltage at a reference point in said sensing circuit including said first thermistor with a voltage at a reference point in said sensing circuit including said second thermistor and determining leak condition based on the basis of the comparison results, in combination with the remaining limitations of claims 17-19.

Conclusion

Art Unit: 2855
